Application/Control Number: 10/562,959

Art Unit: 1793

1. The drawing is objected to under Rule 1.84 in that applicant deleted the reference numeral "25" without replacing any number or character from the drawing such that render the drawing unclear what the blank box represents. Correction is required.

Page 2

2. Claims 1-23 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for core product unit to continuous making core in unit 2, for assembling unit 3 to assemble the core and mold, for casting unit 4 to pour molten metal into the mold assembly, and for demolding unit 5b to separate the casting from the mold assembly, does not reasonably provide enablement for the cycle time of the finished cast part to be determined by the cycle time of core production. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. Applicant in page 11 last para. of the response stated that since the core production unit 2 is coupled to the mold assembly unit 3 by assembly robot 11, the assembly unit 3 is coupled to the casting unit 4 by the conveying device 12, and the casting unit 4 is coupled to demolding unit by conveyor section 20, then applicant concluded that the core making machine is related to the demolding unit 5b by the mold assembly unit 3 and the casting unit 4. However, the core making machine and the demolding unit related to each other is not necessary the cycle time of demolding unit to be determined by the cycle time of the core production unit. For example, the cycle time of the demolding unit can be determined by the moving speed of conveyor 12, 15,

Art Unit: 1793

19 or 20 or vise versa while maintaining the cycle time of core production unit constant.

Thus, applicant's argument is not deemed to be persuasive.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuang Y. Lin whose telephone number is 571-272-1179. The examiner can normally be reached on Monday-Friday, 10:00-6:30,.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jessica L. Ward can be reached on 571-272-1223. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
